711. documents relating to one, James Masterson, a County Surveyor of Amador in 1857 & 1858, who was certainly an acquiantence, if not friend, of Boynton.

711.1 Introduction of settler Charles Boynton to Alex (Aleck, Alexander) Chauvin, July 28, 1855. The date indicates Boynton, in (what is now) Amador County, since 1849, was in S.F. ready to embark for the States. He sold his Amador Sentinel probably that month. Chauvin, besides being a friend, was a Deputy Sheriff and probable Jailer in the County Jail in Jackson, summer ’51 to May ’52. Mr. Chauvin was staying at the American Hotel, whose site is vacant now, but which was on the southeast corner of Broadway and Water.

711.2 A 7 3/4" X 13 3/8", page cut from his personal or a Calaveras County Justice of The Peace ledger book circa 1851 by unknown person. It is numbered "1" and the other side "2". On page 1, in the handwriting of its author, Charles Boynton, Justice of The Peace in northern Calaveras, 1850-51 and later; is an 8 stanza poem written in ink titled "Parody on Bryon" and historically known as "The Greenhorns." Also written in ink on this side is "Dec. 16, 1849," which may be the date Boynton composed the poem. If so, he had been in the Mokelumne River mines since summer of `49. This could be the original if Boynton had such a ledger with him, or he may have copied it in the ledger in 1850 or `51. By December 1849, Boynton had ample experience to be able to write such a poem.

711.2 B A poem by Charles Boynton, an original or copy, in ink in his hand writing, "lines written off Cape Horn on the prospect of pleasant weather and fair wind." It was composed in 1849, maybe in March.

711.2 A.1 Xerox copy of 711.2 A.

711.2 B.1 " " " 711.2 B.

711.3 A Page "3" cut from same journal, includes conclusion of 711.2 B poem and half another entitled, "Parody on `Marco Bozzarris'", probably written aboard ship, 1849.

711.3 B Page "4" cut from same journal, includes rest of "Marco Bozzarris."

711.4 A Page "5" cut from same journal, with poem, in Boynton's handwriting. "Parody on the `Cork Leg'."

711.4 B Page "6" cut from same journal, includes conclusion of "Parody of the `Cork Leg.'" Maybe written in Calif. after Boynton arrived.

711.5 A No page number, but cut from same journal as preceeding pages, a promissory note from Samuel McFarland, early Jackson pioneer and merchant, to Boynton, as J.P. A whimsy upon the "Arrival" of Chauvin in Jackson, 1851 probably.

711.5 B No writing.

711.6 Xerox copy of page(s) in same Boyton journal, "1851, Calaveras County Jail Prison Record." The jail was in Jackson. Oct. 11 - John Green; Dec.22 - Nate Clark.

711.7 Rest of above. Originals retained by James Smalldon of Jackson-Sutter Creek.

711.8 Xerox copy of poem, "Tiperary" handwritten in "Jackson, Amador Co. Feb. 15th, 1857" by James Masterson, County Surveyor of Amador in 1857-58. Boynton's poems were discovered in Masterson's papers by Larry Cenotto, circa September 1982.

711.9 Xerox copy of a poem or song, "My Heart's In Old Ireland", presumably originally written by James Masterson, April 1857 in Jackson. Start of poem or song, "The Gambler's Wife, sung by H. Russel", April 1857 by Masterson.

711.10 Conclusion of "Gambler's Wife", "April 10th, 1857 Jas. Masterson." Also start of "The Old Armchair."

852.0 - In 1983, Labor Day weekend, the Sutter Creek Volunteer Fire Department, to raise funds, conducted tours of The Historic Knight Foundry in that city. Ed Arata and others from the department borrowed photographs (from various persons in town) about the foundry and displayed them. After the event the archives asked Arata to loan the originals so copies could be made for the archives and a set for the department. That expense, $90 odd, was paid with county archive money and archivist's personal funds. Ruben Andreen of Jackson was the photographer.

1372. Album, "C.Y. Brown, Sutter Creek, Aug. 7, 1874, owned by Jim Laughton. Laughton left album to
be studied before its return. Most probable that album held mostly photos, probably of classmates of
Brown's at Napa College (Collegiate Institute), Napa, CA, early 1870's. Most photos were taken by Napa
or bay area photographers. Other photos may very well have been of Brown's family, but these were not
identified. Album was returned 6/13/1986, and Archives urged owner to contact Napa College about its
existence.

Photos of identified Amador people were removed, and others who may have been from Amador Co.,
and took them to Byron's Photo in Jackson, where negatives and prints of each were made.

2222 - Photocopy, article re Steve McNeil, UC Davis & Amador County classes.

2223 - Research notes re Steve McNeil, from Cenotto.

2225 - Carol Land photographs. Negatives made from glass negatives of photos taken circa 1940 by unknown photographer and obtained from El Dorado County Historical Society. El Dorado gave them to Amador County Historical Society 8 years ago to give to museum. But Clyde Berriman, Society member, kept negatives in a drawer at his home for 7 years until El Dorado was told Amador County Museum never received them. John Rafferty, former president of Historical Society, delivered negatives to Archives on March 10, 1989. Negatives are 2 ½ x 2 ½, and titled “Carol Land copies, 5/1987.” Carol Land Photographs: Printed May 1987 on Ilford Multigrade II RC paper using D-72 developer 1:1.5, 2% acetic acid stop, Ilford Universal Fixer 1:5 for 45 seconds (Ilford method) followed by treatment in a bath of hypo-clearing agent with selenium toner at 1:11 for 3 minutes with a 10 minute wash and air drying. The copy negatives were produced on Kodak T-Max film, processed in T-Max developer 1:4, 1% acetic acid stop, Ilford Universal fixer 1:3, rinsed in a 5% solution of NaCO₃ and 5% Na₂CO₃ before treatment in a hypo-clearing bath with a 5% selenium toner added. The negatives were washed for 10 minutes and air dried. Negative Condition Report: Overall, the condition of the Carol Land Negatives is not too bad as almost all are printable and have little chemical contamination. But all show signs of some abuse including minor surface abrasions of both sides, chips of emulsion missing, some chemical staining (some from what appears to be Neucocine dye), lack of proper fixing (only a couple), adhesive damage (from attached tape and labels), improper storage (all should be individually sleeved in either mylar or polyethylene sleeves), and some are highly inflammable nitrate base support and should be stored separately now that copy negatives have been created. All have surface abrasions and pencil marks on emulsion and support base - both from writing notes and numbers and in touching up and putting in clouds (density changes). Most have Neucocine dye staining (used to add to density selectively). All are nitrate and show signs of incomplete fixation and proper washing, several more so than others.
