Beginning in 2006, the Archives is changing its numbering system from serially numerical to year. To differentiate from “2006”, a number already used, the new system will start with “Y” for year and the year, “2006”. It also will number sub-numbers as .01, not .1 as previous.

An item will have one number, regardless of medium. Our original photo will be Y2006.01, a digital photo will be Y2006.01dig, a print will be Y2006.01prt, a CD will be Y2006.01CDR or CDRW, etc. This eliminates the confusion caused by sub-numbering various derivatives of the same item. The abbreviated medium will come after the number, without a period intervening.
